

Solutions to Problem of Your Child Thinking the Medicine Does Not Work

You might consider some of the following ways to work on the problem you identified of your child thinking the medicine does not work.

Change medicine

Sometimes the medicine your child has been prescribed is not quite right for your child. Consider asking your child's doctor for a different medicine.

Have child fill out questionnaires

Sometimes your child just needs to be shown that s/he does better when s/he takes the medicine. Ask your doctor for a questionnaire that your child can fill out on a day when s/he takes the medicine and a day when s/he doesn't. Then you can compare how s/he does and show him/her the results.

Suggest lungtropolis game

Sometimes your child just needs to understand what the medicine is for and how it works. The Lungtropolis game can make this learning fun. Your child can play this game right from CHADIS.
